

SELECTING THE RIGHT REEL PACKAGE

We pride ourselves on creating bespoke reels for our clients therefore this table is for guidance only. If you want something that isn't listed then let us know and we will do our best to accommodate.

Our general advice for the Starter Reel is to cover one area of the industry well. That being said if you are adding to an existing reel, then a 4 Track reel is a good value option for you to select any script types you require.

If you require a specialist reel (Audiobooks, Video games/Animations or Corporate/Narration), please see our other reel packages that accommodate these areas in more detail.
